VRUTIK PANSURIYA

UNREAL ENGINE GAMEPLAY PROGRAMMER | C++ & BLUEPRINTS | AI & SYSTEMS

Ahmedabad, India | +91 9327510334 | 0804vrutikpansuriya@gmail.com | LinkedIn

SUMMARY

Unreal Engine Gameplay Programmer with 1+ year of industry experience and extensive hands-on ownership of gameplay and technical development for PC and PS4 titles. Primary technical contributor in a small development team, handling gameplay programming, core gameplay loop, AI implementation, optimization and platform integration using C++ and Blueprints. Experienced in developing FPS combat systems, intelligent enemy behaviors and complete gameplay progression systems.

EXPERIENCE

Xorbix Studio | May 2025 - Present

Unreal Engine Gameplay Programmer

Strike Warfare: Battle Fury (Tactical FPS) | [Watch FPS Gameplay] | [Steam Store Page]

- Served as primary technical contributor in a 2–5-member team, handling ~70–80% of technical development across gameplay core loop, game design, optimization and platform integration for upcoming commercial release.
- Co-designed and implemented the quest system, covering objectives, progression logic, completion conditions and save integration using C++ and Blueprints.
- Developed enemy, boss and turret AI using Behavior Trees, EQS and AI Perception for player detection and varied combat behaviors.

Train Simulator | [Watch Train Simulator]

- Optimized the existing First-Person Train (FPP) control system by refactoring tick-heavy logic and reducing unnecessary per-frame processing, improving CPU performance by approximately 10–15%.
- Co-designed level progression mechanics around station-to-station objectives, timed arrivals, time-based penalties and bonus XP rewards.
- Expanded control schemes by developing a new Third-Person (TPP) train controller with full keyboard input mapping, replacing the restrictive mouse-click-only FPP interaction model with responsive driving controls.

Optimization & Platform Integration

- Optimized level rendering using HISM, LODs and platform-specific techniques, reducing draw calls by approximately 50–70% in a target level.
- Integrated Steamworks, EOS and PSN; prepared Steam, Epic, Microsoft Store and PS4 builds.
- Added full controller support, including [Input mapping, UI navigation]

PERSONAL PROJECT

Souls-like Third-Person Combat | Unreal Engine 5.4 | [Watch Gameplay] | [Windows Build]

- Developed combat systems featuring light/heavy attacks, dodging, target locking and boss encounters.

TECHNICAL SKILLS

Core: UE5, C++, Blueprints, Git, Visual Studio, Rider

Gameplay and AI: Combat/Weapons, Behavior Trees, EQS, AI Perception

Animation: Animation Blueprints, Blend Spaces

Optimization: Nanite, LODs, HISM, Cull Distance Volume, Texture Optimization

Online and release: Steamworks, EOS, PSN, Achievements/Trophies, MSIX, Localization

EDUCATION

B.Tech Electrical Engineering - Apollo Institute of Engineering and Technology (2017–2021)

3D Digital Game Art & Design - Arena Animation (2022–2024)
